

CONTRACT RALLY

1

NY State employee unions are in negotiations with the governor for a new contract.

2

The unions have made proposals to address the cost of living crisis faced by those who live in high cost areas, but the state has not yet stepped up to help solve the problem.

3

It is imperative that we help our negotiators by sending the state a message. The cost of living downstate is out of control. We need economic relief in our contract.
